

Client Health & Safety

SOLARA MENTAL HEALTH PROGRAM

Solara Mental Health has no documented cases of Coronavirus.

We have implemented rigorous preventative measures to maintain a virus-free environment.

Fortunately, our clients largely represent the demographic least affected in any way by the Coronavirus.

Additionally, our campus design is unlike any other in the entire treatment field:

- our residences are fully self-contained, independent studios
- our clinical building comprises 13 private offices

Thus, we are able to provide the industry's safest treatment environment structure to prevent and contain any potential contagion.

Finally, we follow all CDC sanitization and other best practices, as well as our own, internal MD-directed client testing procedures to insure maximum protection and prevention, so that our facility remains free of Coronavirus.
